

# Maximo for Aviation for Carriers

Maximo for Aviation (MfA) is the most advanced M&E solution in the marketplace. MfA is built on the WORLDS #1 RATED asset management solution for the past 19 years.

- ZERO Customizations
- 200+ API's
- 150+ Ready Reports
- Easy upgrades
- On-Prem, Cloud or SaaS

Part 121 Operators face many market pressures including the need to maximize operating margins, minimize aircraft downtime and ensure airworthiness. Every second an aircraft is on the ground and not generating revenue costs serious money. Of course, there is always going to be times where downtime is unavoidable such as standard interval A, B, C and D checks as prescribed in the OEM maintenance planning documents (MPD).

Maximo for Aviation Planning and Scheduling can help forecast the maintenance requirements based upon planned and unplanned events through intuitive and visually compelling interfaces.

- Maximo is the ONLY solution that can continually rerun the schedule on checks to take advantage of every opportunity to

reduce your time lines.

- In a single easy-to-use screen, view, plan and schedule every bay, asset and resource for BOTH short term and long term.
- Role based dashboards give complete visibility to management while keeping users mission focused with streamlined workflows and navigation.

MfA for Part 121 compliance is a true enterprise class solution designed specifically to answer the complete spectrum of aviation maintenance. Advanced reporting, compliance management, streamlined processes.
