

Fire and Life Safety

Arora's fire and life safety engineers design cutting-edge fire detection and suppression systems to protect life and property. Our dedicated Fire/Life Safety (FLS) practice focuses on Fire Alarm and Fire Protection system design, and Fire Protection/Life Safety Consulting services for everything from large new multi-million square foot facilities, to small complex renovations. Our registered fire protection engineers (FPEs) and NICET Certified Designers service a wide geographic reach and are experienced at assessing hazards and finding the right solution for all of our clients.
