Integrated Facility Management
Business Continuity

Continuity planning is critical to optimizing asset availability, managing vendor networks, and establishing protocols for emergency response. Arora's Facilities Solutions Group can help your organization:

+ **Identify potential threats** such as natural disasters, equipment failures, and cybersecurity risks to develop proactive strategies.
+ **Establish protocols** for fire hazards, power outages, and security breaches to maintain safety and functionality.
+ **Keep buildings, utilities, and critical systems operational** during crises.
+ **Safeguard electronic and physical records** to prevent loss and ensure accessibility.
+ **Prepare backup locations or remote work solutions** to maintain business operations.
+ Integrate **cybersecurity measures and recovery processes** into continuity planning and Unified Command Structure.
+ **Manage contracts and service agreements** to ensure uninterrupted support.
+ **Implement maintenance schedules to support the customer experience** while reducing unexpected failures and downtime.
+ **Conduct drills and training** to ensure staff readiness for emergencies.
+ **Assess response effectiveness** and refining strategies for future resilience and continuous improvement.
