Integrated Facility Management
Cost Management

Facility management programs are tasked with providing greater support with the same or reduced expense. Arora Facilities Solutions helps manage costs by providing robust project management services for capital projects and major repairs, helping establish and track operating budgets for FM services, and by consolidating and managing subcontractor networks. Some key focus areas include:

+ **Implementing smart meters and AI-driven analytics** to track and reduce utility costs.
+ **Reducing emergency repairs and extending asset lifespan** through scheduled maintenance.
+ **Optimizing workspace layouts** to minimize wasted square footage and operational costs.
+ **Negotiating service agreements** to ensure cost-effective procurement and compliance.
+ **Leveraging digital twins and IoT** for predictive maintenance and operational efficiency.
+ **Evaluating subcontractor compliance and cycle times** to improve procurement alignment.
+ **Managing equipment replacement cycles** to balance performance and cost-effectiveness.
+ **Reducing waste and implementing eco-friendly practices** to lower long-term expenses.
+ **Streamlining workflows with automated Integrated Platform tools** leveraged by ATLAS(C) for better resource allocation.
+ **Enhancing financial oversight** with real-time dashboards and cost tracking.
