Integrated Facility Management
Operating Efficiencies

Arora can help streamline processes, leverage economies of scale, and reduce costs by up to 30% through energy efficiency, predictive maintenance, and optimized resource allocation. Arora's Facilities Solutions can help your organization identify and monetize improvements by:

+ **Leveraging IoT sensors integrated with digital twins** enables real-time monitoring to detect critical infrastructure anomalies early and prevent system failures.
+ **Implementing IWMS or CMMS tools like Maximo interfaced with Arora's ATLAS(C)** Suite of Mobile Products to streamline maintenance requests and task assignments.
+ **Using smart meters and AI-driven analytics** to track and reduce energy consumption.
+ **Optimizing occupancy and usage** through real-time utilization tracking and flexible space planning.
+ **Extending equipment longevity** with data-driven preventive maintenance schedules.
+ **Standardizing vendor contracts** with SLAs to improve compliance and performance tracking.
+ **Integrating cloud-based dashboards** for centralized control over HVAC, lighting, and security systems.
+ **Adapting service models** to balance efficiency and customer-specific needs without excessive overhead.
+ **Measuring cycle times and subcontractor compliance** for better procurement alignment.
+ **Enhancing transparency with actionable insights** on facility performance and cost management
